

# SECURITY CONSULTING WHERE TO INVEST \$10K

Feeling overwhelmed when it comes to cybersecurity resources? Contact [sales@evo-stream.com](mailto:sales@evo-stream.com)

## Consider Staff Augmentation

Looking for a dynamic way to expand your cyber security staff without committing to a full time position? In need of a Virtual CISO or subject matter expert to jump into an ongoing project? We can provide resources to fill gaps in areas like DevSecOps, IoT, API, Digital Transformation, Multi-Cloud, SDWAN and more.

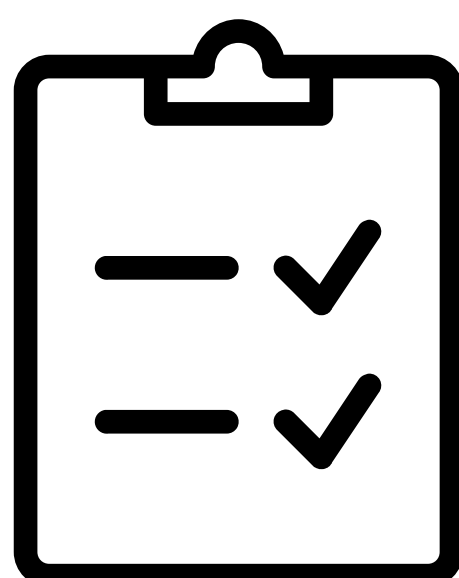

## Incident Response & Remediation

We work to ensure the network, infrastructure and data is restored. Our team will implement all required cybersecurity best practices to confirm that remediation has reduced the probability of further breaches.

## CMMC and Compliance

Cybersecurity Maturity Model Certification (CMMC) Implementation Consulting to help you track, prepare and advance through CMMC and other compliance standards specific to your industry.

## Penetration Testing and Ethical Hacks

We go live with our internal and external penetration testing and vulnerability scans. If you are curious about what the bad actors see in your network as they look to expose assets from inside and outside the environment then we can help.
